MEMORANDUM FOR: Assistant Deputy Director for Intelligence

SUBJECT: Proposed DDI Visits to OBGI

There are several activities of OBGI that were barely skimmed over during the DDI's last visit to OBGI. These could be the subject of several sit-down discussions.

a. First, I propose a discussion of the MIS program, its present status, where we're going, contractual work, production problems, proposals for reducing and modifying coverage, interagency relationships, etc.

b. A second discussion period could be devoted to the geographic research program to examine objectives, trends, problems, accomplishments, and end use of our products.

c. A profitable third period could be in the form of a briefing and discussion on automated mapping and the outlook for the next 5- to 10-year period in this fast-developing field.

JAMES A. BRAMMELL

Director

Basic and Geographic Intelligence
